WORK EXPERIENCE

Aggregate Business Solutions *(centered on computer technology services)*   **Abuja, Nigeria**
Frontend Developer   *March 2024 – Present*
- Assisted colleagues with coding problems, debugging and troubleshooting leading to teamwork, collaboration and overall team growth.
- Solely responsible for designing and developing a website for the organization which boosted the organization's training program reputation, visibility and applications by 35%.
- Fast-tracked development through efficient communication while working in a team of four (4) to complete organizational tasks from the ideation stage to testing.

O3 Finance School *(A financial literacy-focused startup)*   **Osun State, Nigeria**
Volunteer Frontend Developer & Programs Team Member   *January 2023 – Present*
- Collaborating with designers to build scalable live site using React.js, successfully handled deployment and aided user experience by using best practices.
- Monitored the registration process for over 1,000 people, ensuring data integrity and promptly resolving any technical issues
- Engaged in publicizing programs through online platforms and in person interactions, which increased the visibility, attendance and engagement far above stated target by 50%.

Gathpay *(A financial services-focused startup)*   **Remote, Nigeria**
Frontend Developer Intern   *Jan 2023 - April 2023*
- Completed weekly tasks and delivered projects ahead of schedule while working in the software team, communicating and collaborating via Slack and Github.
- Created reusable components to boost productivity and decrease duplication, which facilitated quicker development and collaborating.
- Used Next.js and Typescript to translate Figma user interface designs into real code.

PERSONAL PROJECTS

JobTracka - jobtracka.vercel.app
- Developed and deployed a full-stack (MERN) web app for tracking job applications and goals.
- Utilized Redux Toolkit and Axios for state management and CRUD functionalities. Integrated React Reveal and Animate on Scroll for engaging animation.
- Ensured mobile responsiveness and optimized performance.
- Backend powered by Node & Express, MongoDB for database management. Additional tools: SASS, React-router, bcryptjs, react-query.

TJ-Fits - tj-fits.vercel.app
- Created a comprehensive e-commerce platform enabling users to browse and purchase clothing products.
- Leveraged Sanity CMS to enhance content flexibility and streamline product information management.
- Ensured seamless mobile responsiveness for a smooth user experience.
- Leveraged Next.js, TypeScript, Tailwind CSS, Redux Toolkit, Framer motion, and Firebase to build and enhance the platform.

YelpDamzy - yelp-damzy.vercel.app
- Developed a CRUD web app for viewing and uploading camp locations and reviews. Enabled user authentication with Firebase.
- Ensured fast and responsive mobile performance. Utilized React, TypeScript, Tailwind CSS, context API, and Firebase
